Category: Specific Types of Quilts/Quilting

Listing of books that refer to specific types of quilting, rather than a comprehensive overview of quilting as an art form. The title, author and a brief description of the book is included, as well as the publishing date. The date will help you know whether the book is in full colour, black and white and pre-rotary cutter. Some quilters prefer full colour templates, like beginners. This information will help you choose your references more suited to your needs.
